

Press Release

All *Canadian Architect* awards since 1968 on one map

Wednesday, August 25, 2021.

[The Atlas of Research on Exemplarity in Architecture and the Built Environment](#), in collaboration with [Canadian Architect](#) magazine, presents all the projects, buildings and places awarded since 1968 on a single interactive map and in a visual gallery of over 500 items.

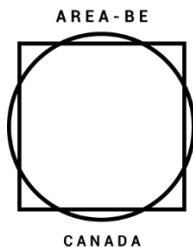

A new classification system by typological categories allows for more precise queries in the database. A table of "unlocated items" collects cases that cannot appear on the map because they are private residences or unbuilt award-winning projects by students.

This corpus was compiled in coordination with Elsa Lam, chief editor of **Canadian Architect** magazine, and the data was collected by the team of M.Arch. students led by Lucas Ouellet at the Université de Montréal: Charles Cauchon and Anna Zakharova.

The realization of this map and the entry of data in the AREA system is funded by the *Canada Research Chair in Architecture, Competitions and Mediations of Excellence* directed by Jean-Pierre Chupin (<https://crc.umontreal.ca/en/>), as well as by the Social Sciences and Humanities Research Council of Canada (SSHRC).

For direct access to the map of *Canadian Architect* magazine list of awards since 1968: <https://architecture-excellence.org/canadian-architect-map/>

To access directly to the visual gallery: <https://architecture-excellence.org/canadian-architect/>
